BASED / TRAVEL

United Kingdom
Remote, hybrid, willing to relocate

ENGINEERING

6.5 cumulative years
Professional since April 2019

CLINICAL

15 years CBT
NHS and private practice

Full-stack product engineer with 6.5 cumulative years of professional software engineering since April 2019 across salaried roles, contracts, client delivery, and independent products. I work primarily in TypeScript, React, Next.js, Vue, Node.js, and Python, with experience across APIs, PostgreSQL, cloud infrastructure, deployment, and live support.

I take useful systems from discovery through implementation and handoff. My recent work includes customer-facing portals, payments, data visualisation, enterprise integrations, and applied AI systems with deterministic safety boundaries and observable traces.

SELECTED DELIVERY

Loans by MAL - regulated UK lender, contract. Architected a fail-closed conversational system across a Vue and TypeScript front end, Node.js and TypeScript backend, shared Zod contracts, deterministic validation, Terraform, and AWS. Presented technical direction to C-suite stakeholders and delivered the working system in four weeks.

Becoming Diamond - coaching business. Delivered an animated marketing site and gated member portal with course content, an AI chat assistant, profile management, Stripe payments, and a git-based CMS the client could edit independently. Next.js App Router, React 19, TypeScript, Tailwind.

Swanage Traffic Alliance. Built a responsive registration and campaign platform with an administration flow usable by non-technical volunteers. Astro, React, Vercel.

SELECTED SYSTEMS

Jeany - content-to-intelligence pipeline. Python services, a Next.js dashboard, and a Go CLI deployed to Kubernetes through Helm, Terraform, and ArgoCD.

Arcana - multi-agent data pipeline. Python, FastAPI, LangGraph, NATS JetStream, LLM-as-judge, and Kubernetes.

Sortie - ensemble AI code review. Three models review a diff independently, a fourth synthesises, and merge can be gated on convergent severity. TypeScript, Bun.

EXPERIENCE

Oct 2024-present | Software Engineer | Oceanheart.ai, independent. End-to-end client and product delivery across full-stack applications, applied AI, evaluation systems, infrastructure, deployment, and support.

May-Jun 2026 | Full Stack Engineer | Loans by MAL, contract. Vue, TypeScript, Node.js, Zod, deterministic safety validation, Terraform, and AWS.

Nov 2023-Mar 2024 | Software Engineer | EDITED, retail analytics. React, TypeScript, Python, data visualisation, and enterprise API integrations.

Jun 2021-Nov 2023 | Software Engineer | Brandwatch, social intelligence. Greenfield enterprise React product work, scalable components, legacy modernisation, and mentoring.

Sep 2020-Feb 2021 | Full Stack Engineer | Telesoft Technologies. TypeScript, Angular, Node.js, Express, and secure cybersecurity features.

Mar 2020-Aug 2020 | Web and Frontend Developer | Appius. CMS modules, customer portals, REST integrations, .NET, JavaScript, and Vue.

Apr 2019-Mar 2020 | Software Developer | School Business Services. Vue.js front end for school financial-management software.

EDUCATION AND TECHNICAL

EDUCATION

PGDip Cognitive Behavioural Therapy -
Royal Holloway, University of London

PGCert Primary Mental Healthcare -
University of Central Lancashire

BSc Psychology - UWE Bristol

TECHNICAL

Languages: TypeScript, Python, Go, Bash

Product and backend: React, Next.js, Vue, Angular, Node.js, FastAPI, REST APIs, PostgreSQL, NATS

Cloud and delivery: AWS, Terraform, Docker, Kubernetes, GitHub Actions, ArgoCD, Vercel, Grafana, Prometheus
