ENGINEERING

6.5 cumulative years
Professional since April 2019

DELIVERY

Discovery to production
Support and handoff

Frontend developer with 6.5 cumulative years of professional software engineering since April 2019. My primary experience is building responsive product interfaces with React, TypeScript, Next.js, and Vue: component systems, data visualisation, interaction flows, and user-facing features shaped around real product needs.

I work closely with product, design, backend, and client stakeholders to turn requirements into clear, maintainable interfaces. I have full-stack competencies, but frontend development is the centre of my professional experience and the work I am targeting.

SELECTED FRONTEND DELIVERY

Brandwatch - social intelligence. Built a greenfield enterprise data-visualisation interface in a team of five, developed scalable React components, modernised a legacy Backbone UI, and mentored junior developers.

EDITED - retail analytics. Built React and TypeScript features for an AI-driven retail analytics product, turning complex model and enterprise data into usable visualisations while working within modern and legacy frontend code.

Artifice. Frontend product work focused on the user-facing interface and interaction layer.

Becoming Diamond - independent client delivery. Built an animated marketing interface and responsive member-portal experience spanning course navigation, profile flows, and an AI chat surface. Next.js App Router, React 19, TypeScript, Tailwind.

Earlier product work. Built Vue interfaces for school financial-management software, followed by CMS modules, customer portals, SSO landing pages, and responsive product interfaces using JavaScript and Vue.

ADDITIONAL PRODUCT WORK

Loans by MAL - regulated UK lender, contract. Built the Vue and TypeScript conversation interface, implementing the user-facing turn flow against shared typed contracts.

Swanage Traffic Alliance. Built a responsive registration experience and a clear administration flow for non-technical volunteers. Astro, React.

■ EXPERIENCE

Oct 2024-present | Software Engineer | Oceanheart.ai, independent. Frontend-focused client delivery across responsive websites, member portals, product interfaces, and interaction-rich user experiences.

May-Jun 2026 | Full Stack Engineer | Loans by MAL, contract. Frontend focus: built the Vue and TypeScript conversation interface and integrated structured turn states through shared contracts.

Nov 2023-Mar 2024 | Software Engineer | EDITED, retail analytics. React and TypeScript product features, data visualisation, and frontend modernisation.

Jun 2021-Nov 2023 | Software Engineer | Brandwatch, social intelligence. Greenfield React product work, scalable components, Backbone modernisation, and junior mentoring.

Sep 2020-Feb 2021 | Full Stack Engineer | Telesoft Technologies. TypeScript and Angular interfaces for secure cybersecurity products.

Mar 2020-Aug 2020 | Web and Frontend Developer | Appius. CMS modules, customer portals, responsive interfaces, JavaScript, and Vue.

Apr 2019-Mar 2020 | Software Developer | School Business Services. Vue.js front end for school financial-management software.

■ EDUCATION AND TECHNICAL

EDUCATION

PGDip Cognitive Behavioural Therapy
- Royal Holloway, University of London

PGCert Primary Mental Healthcare -
University of Central Lancashire

BSc Psychology - UWE Bristol

TECHNICAL

Frontend: React, TypeScript, JavaScript, Next.js, Vue, Angular, Astro, HTML, CSS, Tailwind

Interface engineering: Component architecture, responsive UI, data visualisation, interaction and state design, legacy UI modernisation

Delivery: Cypress, API integration, GitHub Actions, Vercel, testing and structured AI-assisted review
