BASED / TRAVEL United Kingdom Remote, hybrid, willing to relocate	ENGINEERING 6.5 cumulative years Professional since April 2019	DELIVERY Discovery to production Support and handoff
--	---	---

Frontend product engineer with 6.5 cumulative years of professional software engineering since April 2019. I build responsive product interfaces with React, TypeScript, Next.js, and Vue, and I am comfortable carrying a feature from a design or user problem through APIs, testing, deployment, and live support.

My experience spans product teams, enterprise data visualisation, legacy modernisation, secure software, and independent client delivery. I work closely with product, design, backend, and client stakeholders, and I use AI coding tools behind normal review and testing gates.

SELECTED FRONTEND DELIVERY

- Brandwatch - social intelligence.** Built a greenfield enterprise data-visualisation platform in a team of five, developed scalable React components, modernised a legacy Backbone codebase, and mentored junior developers.
- EDITED - retail analytics.** Delivered React, TypeScript, and Python data-visualisation features for an AI-driven retail analytics SaaS and worked with the backend team on enterprise API integrations.
- Becoming Diamond - independent client delivery.** Built an animated marketing site and gated member portal with course content, an AI chat assistant, profiles, Stripe payments, and a git-based CMS the client could edit independently. Next.js App Router, React 19, TypeScript, Tailwind.
- Earlier product work.** Built Vue interfaces for school financial-management software, then CMS modules, customer portals, REST integrations, and responsive interfaces using .NET, JavaScript, and Vue.

ADDITIONAL PRODUCT WORK

- Loans by MAL - regulated UK lender, contract.** Built the Vue and TypeScript front end for a fail-closed conversational system, sharing typed Zod contracts with a Node.js backend and retaining an audit trace for every turn.
- Swanage Traffic Alliance.** Delivered a responsive registration and campaign platform with an administration flow usable by non-technical volunteers. Astro, React, Vercel.

■ EXPERIENCE

Oct 2024-present | Software Engineer | Oceanheart.ai, independent. Client-facing product delivery and independent engineering across websites, member portals, applied AI, evaluation systems, deployment, and support.

May-Jun 2026 | Full Stack Engineer | Loans by MAL, contract. Vue and TypeScript front end, Node.js and TypeScript backend, shared contracts, deterministic safety validation, and Terraform on AWS.

Nov 2023-Mar 2024 | Software Engineer | EDITED, retail analytics. React, TypeScript, Python, data visualisation, and enterprise API integrations.

Jun 2021-Nov 2023 | Software Engineer | Brandwatch, social intelligence. Greenfield React product work, scalable components, Backbone modernisation, and junior mentoring.

Sep 2020-Feb 2021 | Full Stack Engineer | Telesoft Technologies. TypeScript, Angular, Node.js, Express, and secure cybersecurity features.

Mar 2020-Aug 2020 | Web and Frontend Developer | Appius. CMS modules, customer portals, REST integrations, .NET, JavaScript, and Vue.

Apr 2019-Mar 2020 | Software Developer | School Business Services. Vue.js front end for school financial-management software.

■ EDUCATION AND TECHNICAL

EDUCATION

PGDip Cognitive Behavioural Therapy
- Royal Holloway, University of London

PGCert Primary Mental Healthcare -
University of Central Lancashire

BSc Psychology - UWE Bristol

TECHNICAL

Frontend: React, Next.js, Vue, Angular, Astro, Tailwind, responsive interfaces, data visualisation

Languages and backend: TypeScript, JavaScript, Python, Go, Node.js, FastAPI, REST APIs, PostgreSQL

Delivery: GitHub Actions, AWS, Terraform, Docker, Kubernetes, Vercel, testing and structured AI-assisted review
