United Kingdom
Remote, hybrid, willing to relocate

ENGINEERING

6.5 cumulative years
Professional since April 2019

DELIVERY

Discovery to production
Support and handoff

Software engineer with 6.5 cumulative years of professional experience since April 2019 across secure products, customer portals, client delivery, and independent systems work. I am comfortable diagnosing problems across interfaces, APIs, infrastructure, and operational workflows, then documenting and handing over a solution that other people can use safely.

My background combines hands-on engineering with direct support and communication. I have delivered systems for non-technical clients and users, maintained live services, built automation in TypeScript, Python, Go, and Bash, and worked in cybersecurity, financial software, retail analytics, and social-intelligence products.

■ SELECTED OPERATIONAL DELIVERY

Loans by MAL - regulated UK lender, contract. Delivered a conversational system across Vue, TypeScript, Node.js, shared contracts, Terraform, and AWS. Built deterministic validation and audit traces, translated operational constraints for leadership, and supported the system from implementation through handoff.

Becoming Diamond - coaching business. Built a marketing site and gated member portal with profiles, payments, AI chat, and a git-based CMS. The operating model let the client update routine content without an engineer while keeping the wider system maintainable.

Swanage Traffic Alliance. Delivered a registration and campaign platform with an administration flow usable by non-technical volunteers. Astro, React, Vercel.

■ SYSTEMS AND SUPPORT EVIDENCE

Telesoft Technologies - network security. Built secure application features using TypeScript, Angular, Node.js, and Express.

Appius. Delivered CMS modules, customer portals, REST integrations, and responsive interfaces using .NET, JavaScript, and Vue.

Agent and data systems. Built Python and TypeScript tool layers, event-driven services using NATS, containerised runners, API integrations, evaluation traces, and observability with Grafana and Prometheus.

■ EXPERIENCE

Oct 2024-present | Software Engineer | Oceanheart.ai, independent. Client-facing delivery across product systems, automation, applied AI, infrastructure, deployment, live support, and operational handoff.

May-Jun 2026 | Full Stack Engineer | Loans by MAL, contract. Vue, TypeScript, Node.js, Zod, deterministic validation, Terraform, AWS, and stakeholder communication.

Nov 2023-Mar 2024 | Software Engineer | EDITED, retail analytics. React, TypeScript, Python, data visualisation, and enterprise API integrations.

Jun 2021-Nov 2023 | Software Engineer | Brandwatch. Enterprise product delivery, scalable React components, legacy modernisation, and mentoring.

Sep 2020-Feb 2021 | Full Stack Engineer | Telesoft Technologies. Secure cybersecurity application features across frontend and backend.

Mar 2020-Aug 2020 | Web and Frontend Developer | Appius. CMS modules, customer portals, REST integrations, and responsive interfaces.

Apr 2019-Mar 2020 | Software Developer | School Business Services. Vue.js front end for school financial-management software.

■ EDUCATION AND TECHNICAL

EDUCATION

PGDip Cognitive Behavioural Therapy
- Royal Holloway, University of London

PGCert Primary Mental Healthcare -
University of Central Lancashire

BSc Psychology - UWE Bristol

TECHNICAL

Systems: TypeScript, Python, Go, Bash, Node.js, FastAPI, REST APIs, PostgreSQL, NATS

Interfaces: React, Next.js, Vue, Angular, Astro, responsive web applications, data visualisation

Cloud and operations: AWS, Terraform, Docker, Kubernetes, GitHub Actions, ArgoCD, Vercel, Grafana, Prometheus
